Attitudes

-Leadership skills -Ability to learn, - Positive attitude -Flexibility teamwork,
-Dedicated -autodidacta

Experience

Frontend Developer | Didcom | February 2023 - Present

As a front-end developer, I am responsible for analyzing project requirements and creating high-fidelity designs that align with UX (user experience) and UI (user interface) methodologies. I then translate these designs into high-quality, functional web platforms, ensuring an exceptional user experience throughout the development process. My role encompasses both the design and development phases, leveraging my skills to deliver visually appealing and user-friendly solutions. Additionally, I design and develop components based on Material Design to ensure they are reusable and scalable. In my day-to-day work, I design and develop websites that include functional maps, graphs, and CRUD (Create, Read, Update and Delete).

Frontend Developer | Personal | 2022 - Present

During the years I have worked in this field, I have successfully developed a variety of personal projects across different areas such as landing pages, web applications, and mobile application design

Education

Software engineering | Instituto Tecnológico de Sonora (ITSON), | Guaymas, 2019-2023
